PROFILE

Full-Stack Developer based in Los Angeles. I started out as a Front-End developer, but have since found out I love Back-End much more. I have used many languages and tech stacks and can pick up anything new very quickly, but my favorite language to work in is by far Python because of how expressive it is. Besides the work experience listed below, I have used Python and Flask to build many fun side projects.

WORK

- MEDAL.TV** 2021-2022
BLOCKCHAIN DEVELOPER
 - Lead developer on small agile team
 - Built many prototypes for cutting edge new feature of the social media platform
 - Despite the job title I also worked on Front-End and Back-End (React and Python)
- BITCOIN.COM** 2018-2020
SR FULLSTACK DEVELOPER
 - Created an online Bitcoin Casino from scratch in Python
 - Led team on Back-End rebuild from the ground up using microservice architecture
 - Analyzed gameplay data to prevent fraud and make informed changes to games
- THE AGENCY RE** 2016-2018
FRONTEND DEVELOPER
 - Built a new Front-End using Angular, ngrx and the Angular Material toolkit
 - Extended, refactored & cleaned up the legacy Code-Base (Java-like language Apex)
 - Designed and deployed extensive API
