PROFILE

Fullstack Developer based in Los Angeles, I am currently working on online casino games for the cryptocurrency behemoth Bitcoin.com. I have mastered modern Javascript so I can pick up any frontend framework blazingly fast and set up the backend efficiently using Node.js. If your backend requires a different framework, I am also experienced with Spring Boot, AIOHTTP, and Flask. I have also led many dev teams that used Docker, git, practiced agile development, and used a CI/CD pipeline.

WORK

- BITCOIN.COM** 2018-2020
SR FULLSTACK DEVELOPER
 - Created an online Bitcoin Casino from scratch (based on older deprecated casino)
 - Led team on backend rebuild from the ground up using microservice architecture
 - Overhaul front-end design and implementation, switched to Vue.js framework
- THE AGENCY RE** 2016-2018
FRONTEND DEVELOPER
 - Built a new frontend using Angular, ngrx and the Angular Material toolkit
 - Extended, refactored & cleaned up the legacy codebase (Java-like language Apex)
 - Created APIs on remote virtual machines using Node.js
- PRØHBTD** 2016
WEB MEDIA INTERN
 - Streamlined custom CMS backend experience
 - Scripted media preparation process (image resizing and file organization)
 - Found and fixed crucial frontend bugs
